Stephanie

Is the office still closed?

I think the CPG will want to submit a Force Majeure notice for two sampling events that have been delayed until Nov 12. I think we also may need to extend the submission date for the RM 10.9 Pre-Final because CPG members have not been able to review the document.

We did a Force Majeure last year for the Hurricane Irene delays - I think protects the Region and the CPG about criticism associated with delays.

I have a call with the TC this morning; can I call you later?
